RE: CDR 19.4.1 Software Patch

Dear CDR Tool User,

A new CDR software patch (CDR v19.4.1) is available from the Bosch Diagnostics website. Upgrade as soon as possible to realize the benefits of the changes described below. Details of this new version are also provided in the *What's New In this Version* section of the CDR help file

FCA (ALL SUPPORTED MARKETS)

- For 2014+ Jeep Cherokee and Chrysler 200 CDR reports, corrected a formatting issue in the report section "Pre-Crash Data [4 samples/sec]" causing certain data elements to be displayed incorrectly
- For MY2020+ Jeep Compass, added support for "VIN, Current"
- Added support for an unsupported 2019 Jeep Renegade 4x4

FORD (US/CA MARKETS)

- Addressed an issue blocking the download of a MY2020 Ford escape

GM (ALL SUPPORT MARKETS)

- Added support for a 2020 Corvette software ID

SUBARU (ALL SUPPORT MARKETS)

- Addressed an issue which caused some Subaru CDR files collected in 19.3.1 and prior not to open in 19.4

To download this new patch, please visit our website and click on the link for *CDR19.4.1Setup_patch.zip*.
